

# Record of Covid Case in the Philippines year 2020

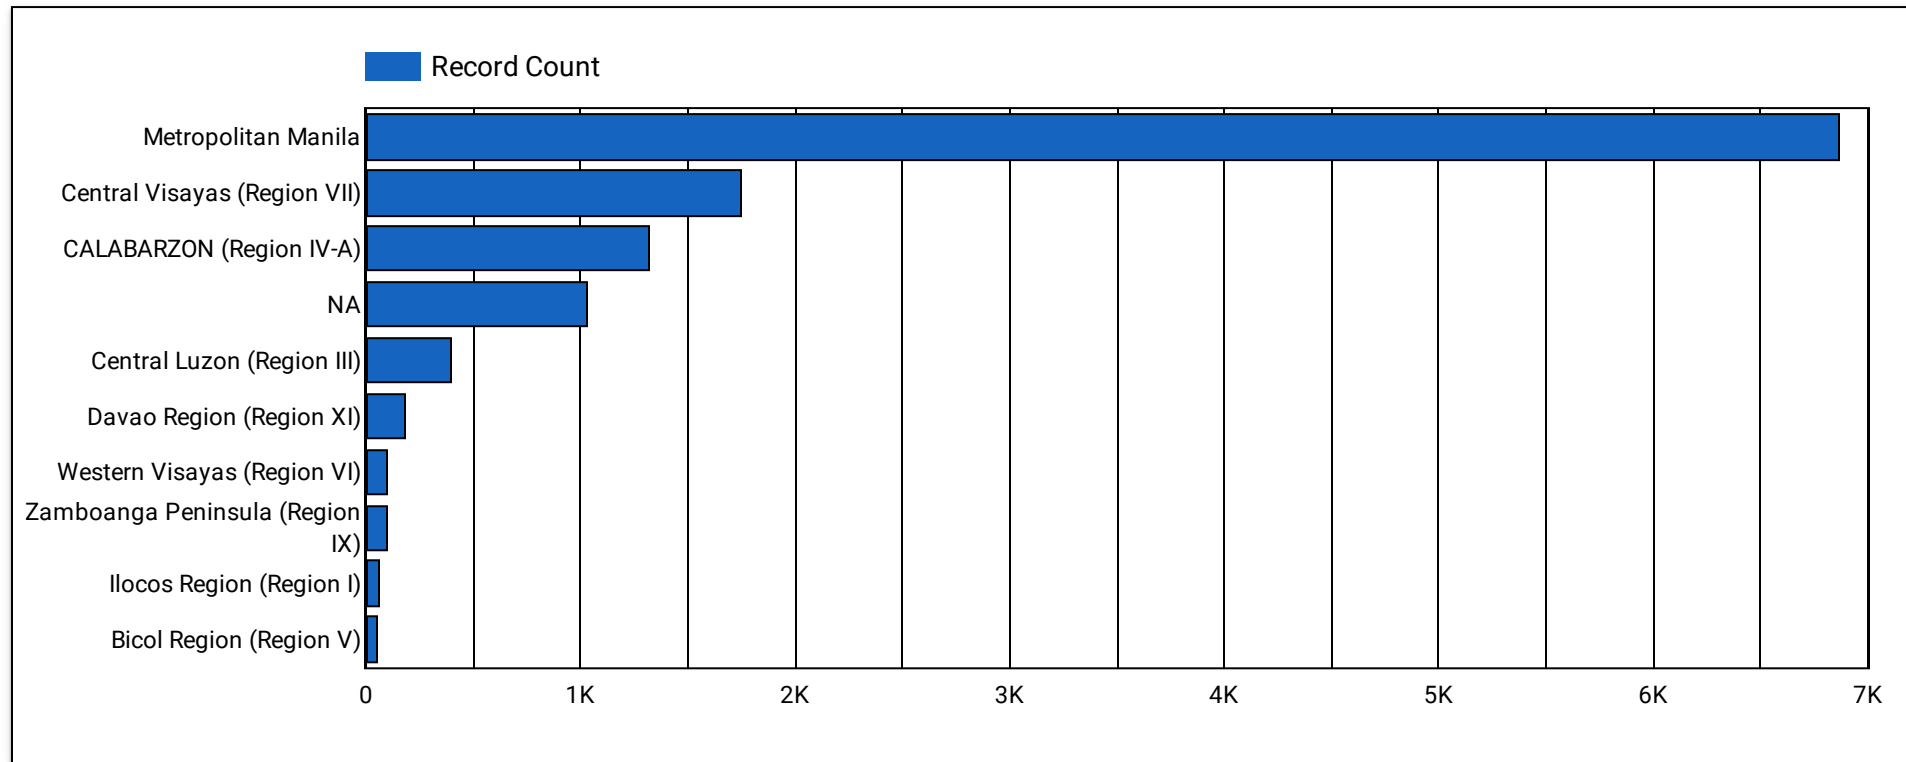

## What is Covid?

Covid is an virus that was discovered in China but due to the sudden growth of the infected people it became an Epidemic virus. The virus not only spread across countries near china but also almost the whole world. Philippines is also one of the most affected as it is a country often visited by foreigners but also near china. It is the a disease that is commonly transmitted through airborne and droplets coming from the infected person.

## Covid can be transmitted through:

- Cough
- Sneeze
- Saliva
- Talk

# Covid cases per region

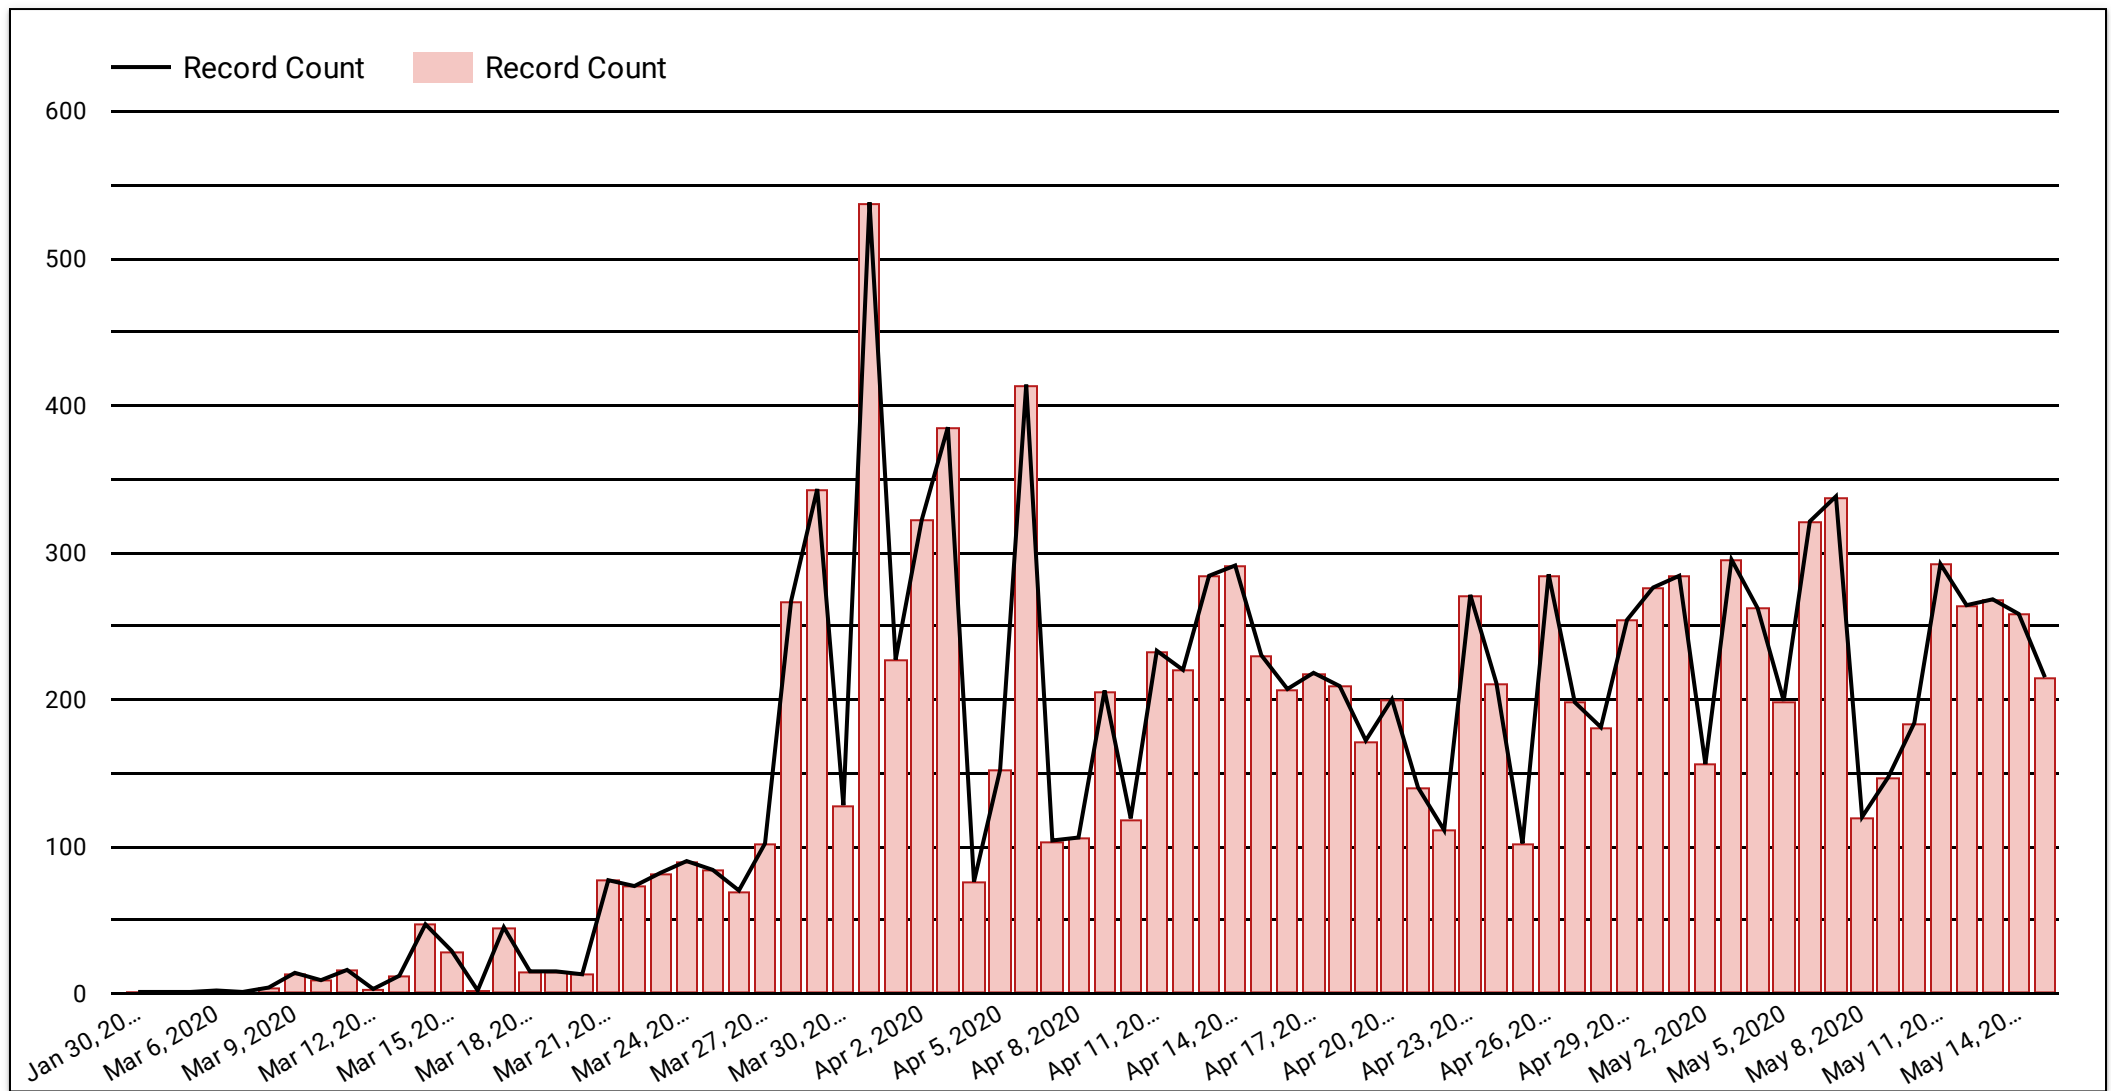

## The Regions that have the most record cases:

1. **Metropolitan Manila** : 6873
2. **Central Visayas (Region VII)**: 1750
3. **Calabarzon (Region IV-A)**: 1327
4. **NA**: 1038
5. **Central Luzon (Region III)** : 401
6. **Davao Region (Region VI)** : 191

With Covid being an Airborne Virus, The place that have the largest population will be susceptible to have more cases. Metropolitan Manila have the largest cases per region as there are many structures, job opportunities, and residential buildings to the place.

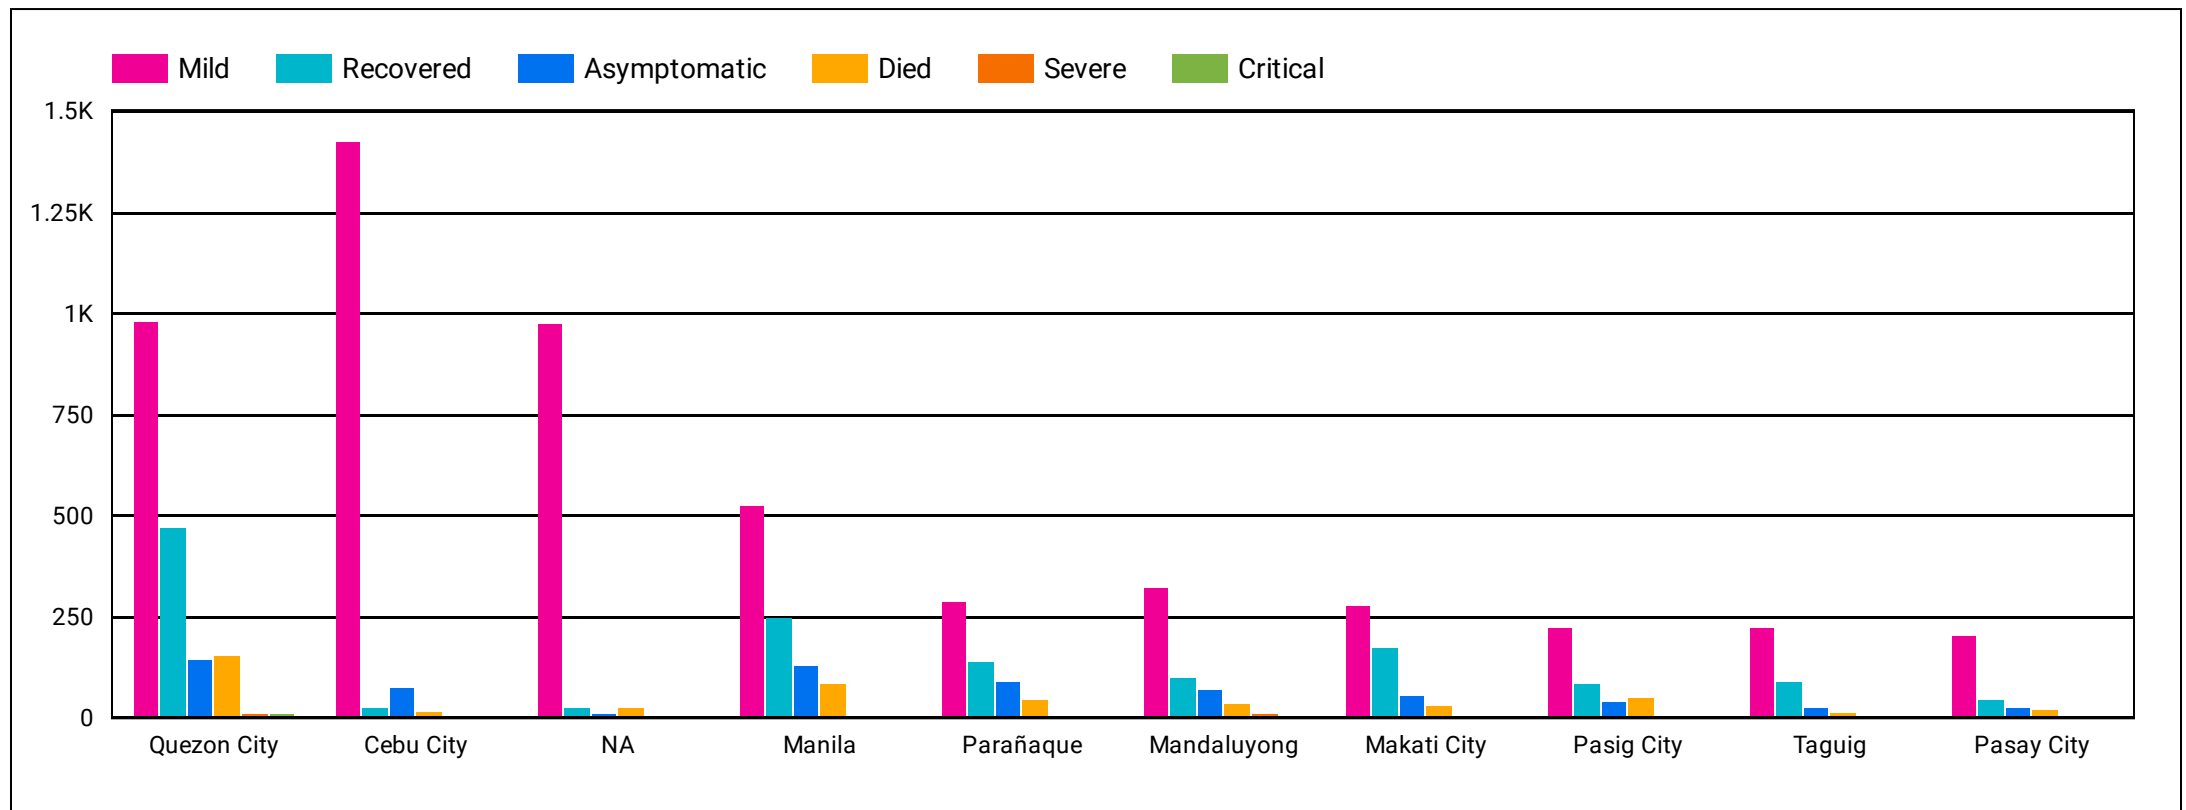

Record Count  
**12,091**

# Covid cases date records

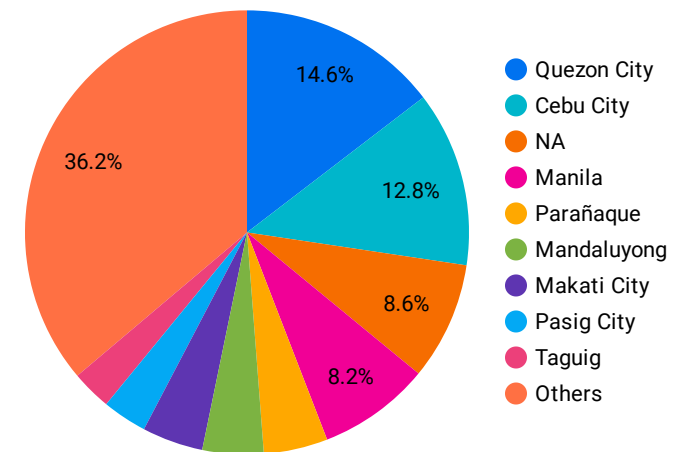

As the government in the Philippines was not expecting the sudden increase of COVID cases and the implementation of the lockdown was already too late, the controlling of the pandemic cases was harder as many in the population are already infected

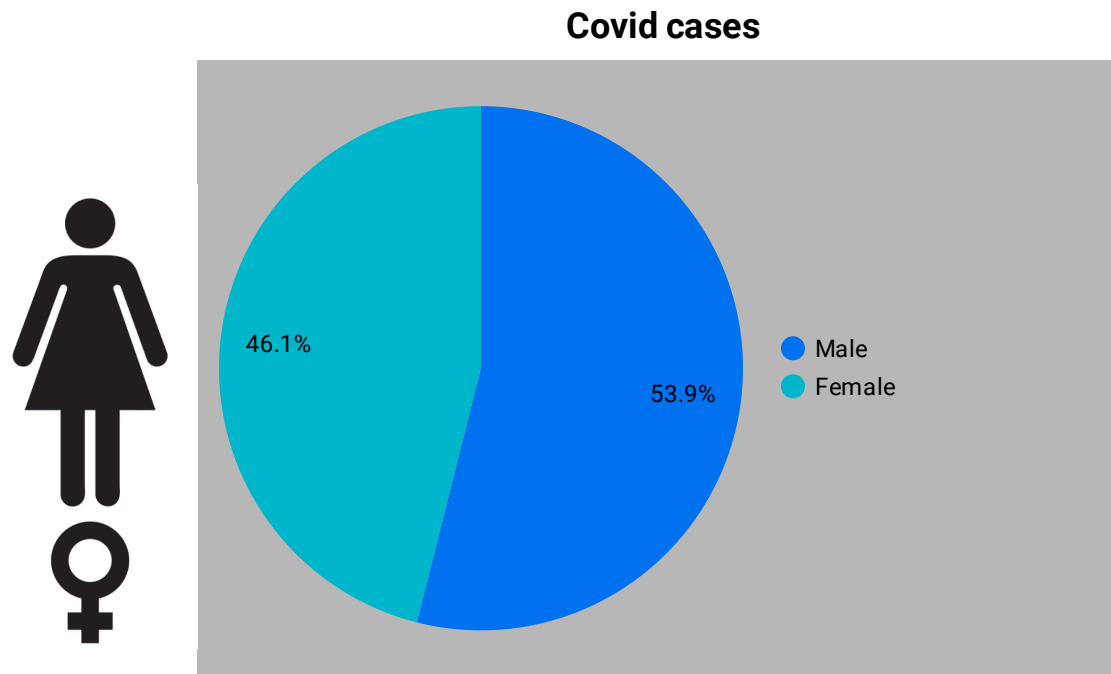

# Region that have the highest cases

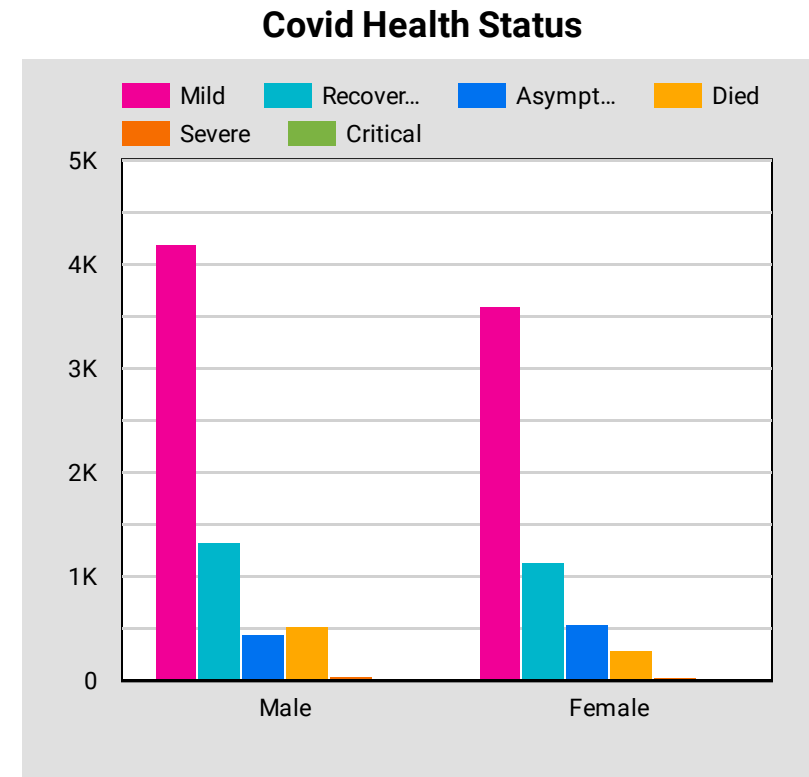

Quezon City have the highest population among the cities under the Metropolitan Manila. We can observe with that many population in Quezon City there are many that is not only infected but also those that have died. Due to the abundance of those infected by Covid many hospitals had a hard time in treating and caring for the patients due to not having enough space, bed, and even workers.

# Difference between both sex

There are more COVID cases for male than female but the death rate for Male is higher than that for female

## Death Rate:

Male: 523 out of 6521

Female: 283 out of 5570

Male: 8%

Female: 5%
